LIVE IN COMFORT

Footprints®
by BIRKENSTOCK

GLOSSARY

FOOTPRINTS GLOSSARY

Following you can find the most important facts about the materials we use as well as cleaning and caring instructions for your FOOTPRINTS.

CATALOGUE

Printing of the FOOTPRINTS catalogue is climate-neutral, i.e. CO₂-emissions that occur during production of the catalogue are calculated and then compensated by investments in recognized climate protection projects. The paper for our catalogue comes exclusively from sustainable certified forestry.

CORK

The extraordinary properties of natural cork were well-known to the ancients and even then it was used for manufacturing the soles of shoes. With good reason: cork combines the highest requirements for elasticity, cushioning and insulation in a natural raw material. This makes it the perfect material for our FOOTPRINTS footbeds.

CUSTOMER SERVICE

FOOTPRINTS shoes are not disposable products. All our shoes are processed and manufactured to be long-lasting, repairable and provide customer satisfaction over many years.

For this reason, our customer service is available for you during the entire lifetime of your shoe and beyond. This starts with our delivery service and includes replacement of footbeds and professional repairs.

FOOTBED

The FOOTPRINTS footbed is based on the natural footprint of a human being and the resultant anatomic shape ensures optimal distribution of pressure from the middle of the foot to the front. The footbed aligned so that the body load is always distributed across the entire area of the foot when walking, standing or running. For our FOOTPRINTS footbed we use only organic materials like jute, natural latex and cork to guarantee the best possible transfer of moisture. For a healthy foot climate and a high level of wearing comfort. All FOOTPRINTS footbeds can be removed for airing or washing (at 30° C) and replacements can be ordered for all models.

HAND - SEWN

Our FOOTPRINTS Originals are hand-sewn and manufactured in the best shoemaker tradition.

This means the upper and sole are sewn together by hand in a precise and intricate process. This is workmanship that requires particular dexterity and an experienced eye. Unlike machine-sewn shoes, every FOOTPRINTS Original is a genuinely unique item characterised by outstanding durability, a perfect fit and maximum wearing comfort.

ensures a firm hold for the foot

Footbed edging

is raised on all sides to protect the foot and keeps the shoe in shape

Toe grip

stimulates the muscles

Anatomic shape

sufficient space in the toe area, like walking on sand

Lateral and longitudinal arch support

support the foot and distribute the body weight evenly

THE FOOTPRINTS FOOTBED

The FOOTPRINTS footbed is based on the natural footprint of a human being and the resultant anatomic shape ensures optimal distribution of pressure from the centre of the foot to the front. The footbed is aligned so that the body weight is always distributed across the entire area

of the foot when walking, standing or running. Carefully selected, natural materials like jute, natural latex and cork guarantee optimal transfer of moisture. For a healthy foot climate and optimal wearing comfort.

THE CORRECT FIT

Always pay attention to the right length when choosing your FOOTPRINTS. A few millimetres room ought to be available in the heel and toe areas. Various models are available in metric sizes for an optimal fit, meaning one size every 5mm. As well as the right length, the right width is also very important for perfect comfort.

For this reason, a large number of our models are available in two widths:

This symbol indicates FOOTPRINTS for normal, sturdy feet.

This symbol is for slim, narrow feet.

P A S S I O N

for good shoes

Far from being a contradiction, for FOOTPRINTS, innovation and tradition are a concept. For this reason, we conserve and nurture our know-how and experience of the traditional shoemaker's trade

Selected upper leathers determine the character of our shoes, which are tanned gently without any use of plastic covering colours. Our anatomically shaped FOOTPRINTS footbed consists only of organic materials like the finest jute, natural latex, the purest Portuguese cork and a fine leather cover. You will appreciate the FOOTPRINTS quality with every step.

Maximum care at every stage, no matter how small, is the key to the production of our shoes.

For this reason we manufacture our FOOTPRINTS Originals today according to old shoemaker tradition using intricate hand-sewing. Upper and sole are sewn several times by hand using a tear-resistant nylon thread. This is a physically demanding job, which requires both particular dexterity and above all a trained eye. It is this workmanship that ensures a perfect fit and optimum comfort.

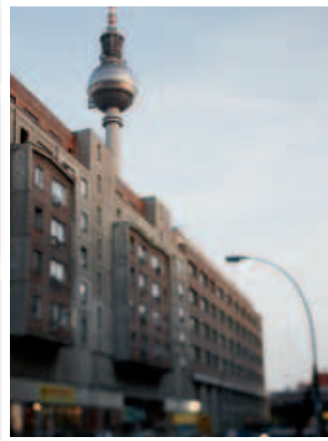

Quality is the best reason to buy. It may sound rather old-fashioned these days but, for us, shoes are not disposable items. FOOTPRINTS are designed to provide you with pleasure over many years and only by using the best materials can we do justice to this claim.

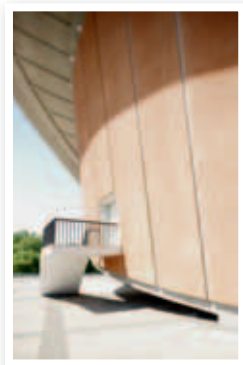

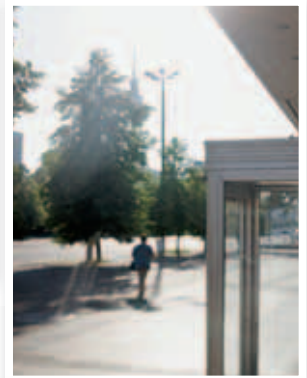

All our FOOTPRINTS footbeds are and always have been manufactured exclusively in Germany. Our shoe models are manufactured by experienced partners according to the strictest quality specifications. Two of these companies are located in Germany (in Thuringia and Hesse), with further partners in Portugal (Caldas de Vizela). Our relationship is characterised by many years of cooperation based on respect and trust. Many of the production staff can look back on more than 40 years of professional experience. It is our aim to preserve this artisan know-how for the future.

A PERFECT DAY IN BERLIN.

There's lots to see in Berlin. So much so, it's quite incredible. The question is, where to start. What's the best place to go if you have just a weekend or maybe just one day?

10:00 a.m. Café Sorgenfrei

Start the day by having breakfast like a king in Schöneberg. In the Café Sorgenfrei, you can enjoy organic coffee, cakes and the finest home-made delicacies in lovingly designed Formica surroundings. Breakfast is available

all day long and nostalgia abounds, with kidney-shaped tables and tulip-shaped lamps.
*Goltzstr. 18,
U Nollendorfplatz,
www.sorgenfrei-in-berlin.de*

12:00 p.m. TV tower Alexanderplatz

Time to get up and go - 203.78 metres up to be precise. The view from the TV tower is an impressive one, from here you can see the Reichstag, the Brandenburg Gate and Berlin's main station, as well as the

Olympic Stadium, Museum Island or Potsdamer Platz. A breathtaking panoramic view of Berlin.
*Panoramastraße 1A,
U Alexanderplatz,
www.tv-turm.de*

2:00 p.m. Currywurst

Time for 'currywurst' - curried sausage Berlin-style. Berlin's best currywurst joint with 100% organic ingredients is located right next to the department store KaDeWe. Witty's make all their sausages and sauces

themselves. -And you can taste it too. The thick organic Belgian fries with "grandma's secret recipe sauce" are a must with every wurst.
*Witty's, Wittenbergplatz 5,
U Wittenbergplatz,
www.wittys-berlin.de*

3:00 p.m. East Side Gallery

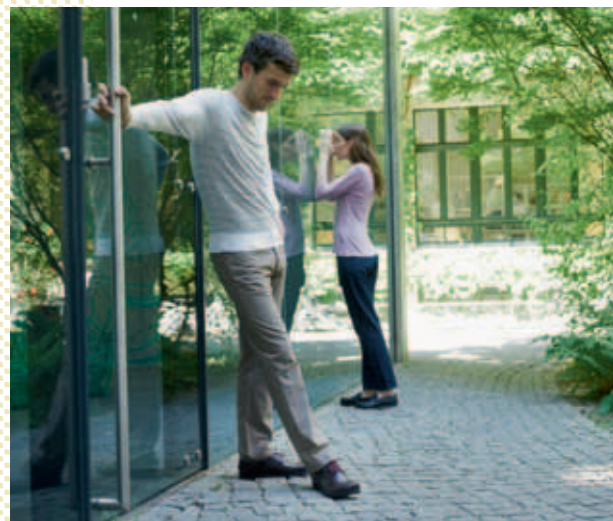

On we go to the East Side Gallery. A monument to peace and reconciliation, this is the longest permanent open-air gallery in the world. Just after the Berlin Wall came down, round 120 artists from around the

world came together spontaneously to transform the 1.3 kilometres of dull concrete into a unique collection of political and poetic murals.
*Mühlenstraße,
U Warschauer Straße,
www.eastsidegallery-berlin.de*

6:00 p.m. Hackesche Höfe

Interesting shops, exceptional designers and extraordinary architecture. The quarter around Hackescher Markt is for shopping enthusiasts only. As well as a variety of good restaurants, bars and clubs, the numerous galleries,

boutiques and delightful craft shops entice shoppers to browse and discover. *Rosenthalerstraße 40/41 und Sophienstraße 6, U Weinmeisterstraße, www.hackesche-hoefe.com*

8:00 p.m. Friedrichstraße

Take a stroll over the Museum Island and head for Friedrichstraße, probably Berlin's most exclusive area. Here are also plenty of good restaurants. The "Borchardt" or "Fischers Fritz" are well-known beyond the

city boundaries of Berlin but there are also less prominent names around Friedrichstraße that offer the finest gourmet cuisine. *www.borchardt-catering.de, www.fischersfritzberlin.com*

10:00 p.m. Potsdamer Platz

The night is still young. Potsdamer Platz is one of the most exciting locations in the German capital. Fancy a trip to the casino? Or maybe the late-night show of the famous Udo Lindenberg musical? Or would you

prefer a sophisticated after-dinner cocktail in the Ritz Carlton's exquisite Curtain Club? Everyone to his taste. *U Potsdamer Platz www.potsdamerplatz.de*

24:00 h Nightlife

For those who are still fit (or young) enough, it's time for the Berlin nightlife now. Countless clubs and discos are available, either directly on Potsdamer Platz or by

foot, taxi or via underground further afield. There's something to cater for all tastes. And don't forget: there are no closing times in Berlin...

A person is sitting on a concrete ledge, wearing light blue denim jeans with the cuffs rolled up. They are wearing brown and white cow print mules with black straps. The background is a blurred outdoor setting with a concrete surface. The text is overlaid on a semi-transparent yellow banner.

GLOSSARY

NATURAL LEATHER

We select only the finest and best natural leather for FOOTPRINTS. A changing grain pattern and minor irregularities in the surface serve to emphasise its naturalness. For cleaning our natural leather shoes, we recommend a soft brush and household cloth that is slightly moistened with warm water. Classic hard wax polish should then be applied to the shoes using a lint-free cotton cloth. After drying, buff the wax polish until your FOOTPRINTS regain their shine.

NUBUCK LEATHER

Nubuck is one of the most luxurious type of leather. It has a highly-refined structure and a characteristically soft, velvety surface. Its extra wide pores ensure outstanding transfer of moisture and a pleasant foot climate. Care for your FOOTPRINTS nubuck leather shoes using only a nubuck brush and nubuck spray. In case of damp, always let the leather dry slowly so that it does not become too hard before brushing it. Through this, the nubuck leather will retain its soft, velvety and glossy look for a long time.

SOLES

Regardless of what material was used, all our soles are extremely shape-retaining and sturdy yet at the same time flexible and pleasantly cushioning on impact. With our PU and TPU soles for example, a core of CFC-free foamed polyurethane ensures comfortable walking and standing due to millions of tiny air bubbles. This protects the joints and supports natural movement. Our rubber and TR soles in turn have a particularly good grip and are anti-slip, while our classic leather soles offer a high level of wearing comfort and a pleasant foot climate. The choice of sole material is always coordinated perfectly to the relevant shoe model.

SUEDE

Suede is premium-quality leather with a pleasantly soft surface with extra wide pores. Suede shoes should be impregnated using a suitable spray on a regular basis. Surface dirt can be removed by brushing, while a pumice stone or raw leather rubber will help to remove any marks or spots. Heavier soiling can be washed off carefully using soap and water. Always allow suede shoes to dry slowly and then roughen the leather gently using a fine wire or rubber brush before impregnating them again.

WAXY LEATHER

The waxy leather used for FOOTPRINTS is highly robust and resistant. A protective layer of dyed wax ensures a matt lustre and a water-repellent surface. Waxy leather shoes should be cleaned with a dry brush or using a damp cloth. For care, we recommend a combination of coloured wax to cover up any scuffing and refresh the colour and finishing with a thin layer of waxy leather polish.
